

1. Create an android app to illustrate activity life cycle.

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.example.hellosai;

import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
import android.util.Log;

public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        Log.d("tag", "My APP has created.");
    }
    @Override
    protected void onStart() {
        super.onStart();
        Log.d("tag", "My APP has started.");
    }
    @Override
    protected void onRestart() {
        super.onRestart();
        Log.d("tag", "My APP has restarted.");
    }
    @Override
    protected void onPause() {
        super.onPause();
        Log.d("tag", "My APP has paused.");
    }
    @Override
    protected void onResume() {
        super.onResume();
        Log.d("tag", "My APP has resumed.");
    }
    @Override
    protected void onDestroy() {
        super.onDestroy();
        Log.d("tag", "My APP has destroyed.");
    }
}
```

Output

App opened:

My APP has created.

My APP has started.

My APP has resumed.

App Minimized:

My APP has paused.

App reopened from recent apps:

My APP has restarted.

My APP has started.

My APP has resumed.

App removed from recent apps:

My APP has paused.

My APP has destroyed.

2.1. Create an android app to visit a specified web page (Use Implicit Intent)

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <EditText
        android:id="@+id/tf"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:hint="@string/enter_uri"
        android:inputType="textUri"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintHorizontal_bias="0.497"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent"
        app:layout_constraintVertical_bias="0.376" />

    <Button
        android:id="@+id/go_button"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="@string/go"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintHorizontal_bias="0.498"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/tf"
        app:layout_constraintVertical_bias="0.158" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.example.implicitintent;

import androidx.appcompat.app.AppCompatActivity;

import android.content.Intent;
import android.net.Uri;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;

public class MainActivity extends AppCompatActivity {

    Button b;
    EditText et;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        b = findViewById(R.id.go_button);
        et = findViewById(R.id.tf);

        b.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                String text = et.getText().toString();
                Intent i = new Intent(Intent.ACTION_VIEW, Uri.parse(text));
                startActivity(i);
            }
        });
    }
}
```

Output

2.2. Create an android app to navigate between activities(Use Explicit Intent)

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:id="@+id/textView"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="69dp"
        android:layout_marginTop="150dp"
        android:layout_marginEnd="69dp"
        android:layout_marginBottom="150dp"
        android:text="Welcome, this is my first page"
        android:textColor="#FF5722"
        android:textSize="20sp"
        android:textStyle="bold"
        app:layout_constraintBottom_toTopOf="@+id/button"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

    <Button
        android:id="@+id/button"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="93dp"
        android:layout_marginEnd="93dp"
        android:layout_marginBottom="342dp"
        android:backgroundTint="#009688"
        android:onClick="callSecond"
        android:text="Go to the second page"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintHorizontal_bias="1.0"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/textView" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

activity_second.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
        xmlns:app="http://schemas.android.com/apk/res-auto"
        xmlns:tools="http://schemas.android.com/tools"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        tools:context=".SecondActivity">

    <TextView
        android:id="@+id/textView"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="54dp"
        android:layout_marginTop="150dp"
        android:layout_marginEnd="55dp"
        android:layout_marginBottom="150dp"
        android:text="Welcome, this is my second page"
        android:textColor="#009688"
        android:textSize="20sp"
        android:textStyle="bold"
        app:layout_constraintBottom_toTopOf="@+id/button"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

    <Button
        android:id="@+id/button"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="102dp"
        android:layout_marginEnd="102dp"
        android:layout_marginBottom="356dp"
        android:backgroundTint="#F44336"
        android:onClick="callFirst"
        android:text="Go to the first page"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/textView" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.example.explicitintent;

import androidx.appcompat.app.AppCompatActivity;

import android.content.Intent;
import android.os.Bundle;
import android.view.View;

public class MainActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }

    public void callSecond(View view) {
        Intent i = new Intent(getApplicationContext(), SecondActivity.class);
        i.putExtra("rno", 1270);
        i.putExtra("name", "sai");
        startActivity(i);
    }
}
```

SecondActivity.java

```
package com.example.explicitintent;

import androidx.appcompat.app.AppCompatActivity;

import android.content.Intent;
import android.os.Bundle;
import android.view.View;
import android.widget.Toast;

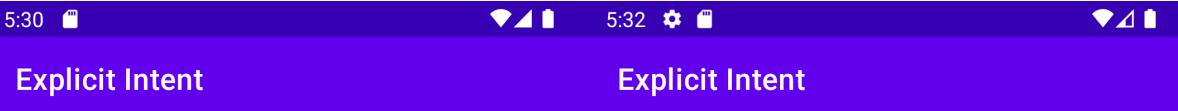

public class SecondActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_second);

        Bundle bundle = getIntent().getExtras();
        int rno = bundle.getInt("rno");
        String name = bundle.getString("name");
        Toast.makeText(getApplicationContext(),"Roll No: " + rno + " Name: " + name,
        Toast.LENGTH_LONG).show();
    }

    public void callFirst(View view) {
        Intent i = new Intent(getApplicationContext(),MainActivity.class);
        startActivity(i);
    }
}
```

Output

Welcome, this is my first page

Welcome, this is my second page

GO TO THE SECOND PAGE

GO TO THE FIRST PAGE

Roll No: 1270 Name: sai

3.1. Create an android app to perform mathematical operations (+, -, *, /, %) (Use Buttons, EditText & Toast)

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <EditText
        android:id="@+id/num1"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="10dp"
        android:layout_marginTop="150dp"
        android:layout_marginEnd="100dp"
        android:ems="10"
        android:hint="Enter Value 1"
        android:inputType="textPersonName"
        app:layout_constraintBottom_toTopOf="@+id/num2"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

    <EditText
        android:id="@+id/num2"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="100dp"
        android:layout_marginTop="50dp"
        android:ems="10"
        android:hint="Enter Value 2"
        android:inputType="textPersonName"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/num1" />

    <Button
        android:id="@+id/p"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="20dp"
        android:layout_marginTop="72dp"

3.2. Create an android app to display text in bold, italic, and normal style with left, right and centre alignments (Use Radio Button, CheckBox controls)

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:id="@+id/textView"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginStart="136dp"
        android:layout_marginTop="95dp"
        android:layout_marginEnd="137dp"
        android:text="FONTS TEST"
        android:textColor="#9C27B0"
        android:textSize="24sp"
        app:layout_constraintBottom_toTopOf="@+id/c1"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

    <CheckBox
        android:id="@+id/c1"
        android:layout_width="140dp"
        android:layout_height="wrap_content"
        android:layout_marginStart="50dp"
        android:layout_marginEnd="5dp"
        android:layout_marginTop="65dp"
        android:layout_marginBottom="5dp"
        android:text="BOLD"
        android:textSize="18sp"
        app:layout_constraintBottom_toTopOf="@+id/c2"
        app:layout_constraintEnd_toStartOf="@+id/rg"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/textView" />

    <CheckBox
        android:id="@+id/c2"
        android:layout_width="140dp"
        android:layout_height="wrap_content"
        android:layout_marginStart="50dp"
        android:layout_marginEnd="5dp"
        android:layout_marginTop="5dp"
        android:layout_marginBottom="5dp"
        android:text="ITALIC"
        android:textSize="18sp"
        app:layout_constraintBottom_toTopOf="@+id/c3"
        app:layout_constraintEnd_toStartOf="@+id/rg"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/c1" />

    <CheckBox
        android:id="@+id/c3"
        android:layout_width="140dp"
        android:layout_height="wrap_content"
